

ID No.	K3011
Project Title	Investigating Putative Dendritic Cell Precursors (pre-DC) with Neutrophil Progenitor Properties
Principal Investigator	Florent Ginhoux (Senior Principal Investigator, A*STAR)
Project Members IMSUT Host Researcher Members	<p>Kenta Nakai (Prof., IMSUT)</p> <p>Charles Antoine Dutertre (Research Scientist, A*STAR)</p> <p>Ken Ishii (Prof., IMSUT)</p> <p>Phit Ling Tan (PhD Student, IMSUT)</p>
Report	<p>Our original plan was to conduct experiments to verify the hypothesis obtained with an <i>in-silico</i> research at IMSUT. Because of the COVID-19 pandemic, it was impossible to do such an experiment and thus we did several online discussions and have tried to strengthen the hypothesis with more <i>in-silico</i> analyses.</p>
