

THE UNIVERSITY OF TOKYO

2017 International Symposium on Joint Research Project
of the Institute of Medical Science, The University of Tokyo (IMSUT)

Deciphering Genome Big Data

March 21st (Tuesday), 2017 9:30 ~

Free Admission

Tomy Conference Hall (8th Floor)
in IMSUT Hospital Building (Shirokane Campus)

<http://www.ims.u-tokyo.ac.jp/imsut/jp/access/access/>

Speakers

Plenary Lecture-1

Elizabeth Worthey (HudsonAlpha Institute for Biotechnology)
“Transformation of Big Data into Clinically Actionable Knowledge; Driving the
Genomic Medicine Revolution”

Plenary Lecture-2

Mark Cowley (Garvan Institute of Medical Research)
“Deciphering Whole Genome Sequencing Data, at Scale, and in the Clinic, for
Rare Disease and Cancer Diagnosis”

Symposium

Tatsuhiko Shibata (The University of Tokyo)
Yutaka Suzuki (The University of Tokyo)
Naomichi Matsumoto (Yokohama City University)
Yoichi Furukawa (The University of Tokyo)
Yukinori Okada (Osaka University)
Jun Yasuda (Tohoku University)

Co-organized by

Medical Genomics Research Initiative, The University of Tokyo

Supported by

Priority Issue on Post-K computer, Integrated Computational Life Science to Support Personalized and Preventive Medicine
